today and tomorrow

Product Data Analyst (m/f)

For our client, a well-known pharmaceutical company in Basel, we are looking for a Product Data Analyst (m/f).

Background

We are transforming the way we do business and how we work together for patients and customers. In that context, we evolve the role of the Product Data Analyst, a member of the Data and Analytics Center of Excellence, based in Global Supply Chain (PTS).

General Information

- Start date: 01.09.2021
- Latest start date: 01.10.2021
- End date: 18 months
- Extension: possible
- Workload: 100%
- Work location: Basel
- Home Office: yes

Tasks & Responsibilities

- Accountable and the point of contact for the end to end Product Data for Global Supply Chain Materials
- Initiating and Monitoring of product master data creation, change and retirement progress
- Responsible for acting as a connector between the technical data science resources and supply chain users for developing new Reporting & Analytics tools (and for Product Supply Chain Configuration)
- Translate business needs into master data / analytics requirements and translate analytical findings into real business solutions
- Gather supply chain / business users inputs for developing new state of the art tools, processes, reports
- Act as the data steward

- Responsible for building and maintaining collaborative relationships with key stakeholders and managing expectations to adopt and implement FAIR (Findable, Accessible, Interoperable and Reusable) data shared and engine processes, systems and tools.
- End to end responsibility for product master data for assigned product families and ensure implementation is completed on time
- Provide product insights and translate business needs into analytic requirements (diagnostic, descriptive, prescriptive analytics) to ensure good and fast decision-making.
- Drive data compliance to decisions and standards by auditing accuracy, readiness and completeness
- Leveraging data and analytics capabilities with business knowledge to enable the best decisions
- Active participation in the different product and project related working groups with an impact on Global Product Data Management
- Generation of Key Performance Indexes and health indicator
- Execution of periodic data audits and analysis with Data Content Owners
- Transforming organizational mindset and capability to drive value from data

Must Haves

- Bachelor or Master Degree in Life Sciences, Engineering, Supply Chain Management, Business Management or any similar
- Min. 5 years' Supply Chain Management and/or Master Data experience in the pharmaceutical industry
- Knowledge of SAP/R3 (MM) and/or SAP/S4 applications is mandatory; further experience with ERP systems are an advantage and supply chain systems. (SAP, APO, OMP)
- Proficient in one or more Reporting & Analytics tools (e.g. BW, Tableau, Alteryx, SAC, GBT, IDQ (Informatica) or any similar)
- Experience in project and process management (leading or participating) is a plus
- Experience in the management of Printed packaging materials with Affiliates and Regulatory is an advantage

Nice to Haves

- Former pharma experience
