Global R&D Academy Technology & Innovation Leader (m/f)

For our client, a well-known pharmaceutical company in Basel, we are looking for an Information Architect (m/f).

Background

The R&D Academy Technology Leader will have an enterprise wide impact and sphere of influence. This is a highly important leadership role in the R&D Academy (RDA). We have a big vision for scientists with technology playing a key role in offering them a futuristic “one place” for their personalized learning and collaboration. This role will work closely with the R&D Academy Head and the core team in developing the MVPs and re-iterations for the technology solutions the RDA aims to offer for scientists . The role will also partner with scientists to translate insights into actionable growth opportunities for the Pharma organization. Key focus areas include creating a proactive, agile, global organization to build impactful learning experiences for scientists, creating and fostering a learning culture, and driving continuous improvement of R&D Academy services.

General Information

- Start date: 01.07.2021
- Latest start date: 01.08.2021
- End date: 31.12.2021
- Extension: planned
- Workload: 100%
- Work location: Kaiseraugst (home office until further notice)
- Remote: 2 days per week maximum, prior approval needed
- Travel: no
- Team: 50+

Tasks & Responsibilities

- Lead the strategy and vision of technology for learning platform and other technology for all scientists
- You lead the identification and validation of technologies through proof-of-concepts that you design
- You identify and manage required partnerships to ensure cutting-edge capabilities in the intersection of artificial intelligence, technology, and learning
- You champion an agile, iterative development process driven by design thinking, frequent end-user input, and constant insight generation from data
- You bring innovation to how and what scientists want to learn to bring medicines to patients faster

Must Haves

- Strategic thought leader with proven experience designing innovative learning technologies
- Proven working experience in a leading position in the intersection of technology, learning and innovation preferably in a pharmaceutical environment
- Experience within a Tech company specializing in creating and providing learning content through multiple channels
- 5y+ of relevant experience working as Business Analyst / Learning Technology Specialist in a comparable environment (defining a new approach in relation to Learning)
- Extensive experience leading the implementation and adoption of learning technologies
- Fluent in written and spoken English language

Who You are

- You are motivated by your impact on scientists and ultimately on patients
- You thrive in a fast-paced, complex work environment with lots of humor
- You are motivated by the opportunity to rethink our approach to learning
- Your focus is always on making things possible rather than why things cannot happen
- No specific degree needed, but you need to be a leader in the intersection of technology, learning, and innovation
- Comfort and skills operating in a heavily matrixed organization with a keen sense of required communication with various stakeholders
- Ability to quickly grasp concepts and outstanding ability to handle complexity by simplifying it and providing clear directions to the team
- Creative, innovative with an open mindset of possibilities
